dataEXPERT

Use all the advantages of dataEXPERT for your production control and planning

The dataEXPERT...

- ◆ gives a detailed production overview when cutting leather hides
- ◆ provides information about the efficiency of your production process
- ◆ presents historic leather consumption figures
- ◆ provides a complete database for your calculations and evaluation
- ◆ gives information about all available leather hides in stock
- ◆ acts as the basis for calculations in your purchasing department
- ◆ offers the ability to compare suppliers

know how

Make use of the dataEXPERT production overview

Get a detailed production overview when cutting leather

dataEXPERT offers you all the important data about your production process in an easy-to-read display. You can check the daily, monthly and yearly production output for each workstation. You can also evaluate information about your leather consumption and orders at any time.

Check the efficiency of your production

dataEXPERT offers different ways to evaluate the efficiency of your production process. Stay informed about the work of several employees or workstations. Check the processing time required at different steps in your process. View both yield and waste figures for the current production run or for past orders. Finally, view this information for your complete facility, or for a specific order.

Stay informed about past leather consumption

With dataEXPERT you can view information about the average yield of every leather finish and colour, at any time. Additionally, this data can be compared across different suppliers of the same leather type. This gives your purchasing department concrete and reliable information for their future sourcing decisions.

Take advantage of pre-calculation, calculation and evaluation

The data foundation within dataEXPERT offers you many possibilities. Pre-calculate the base leather cost for a new model without cutting. Optimize patterns for new models using representative leather hides. Perform different types of evaluations depending on leather consumption and specific suppliers. Calculate future prices reliably, before you make a cut. Use data from past orders to calculate and evaluate possible solutions for future orders and leather types.

Administer your leather stock

Retrieve information about the available leather finishes and colours in your current stock, whenever you need it.

Compare your suppliers

The detailed data in dataEXPERT gives you information about delivered leather quantity and quality. At any time, view the results from the system's hide capture and compare these results with the records of your supplier. This comparison and control lets you react quickly when there is a discrepancy.
