know how

Become more profitable for your leather cutting yields with the scan conveyorEXPERT

Control your receipt of hides completely

The scan conveyorEXPERT is suitable for any company regardless of size.

The scan conveyorEXPERT gives you the tool to control automatically every hide regarding size, blemishes and quality zones. This guarantees a perfect overview and documentation of your stock and enables you an instant check with the record of your supplier.

Optimize your leather yield

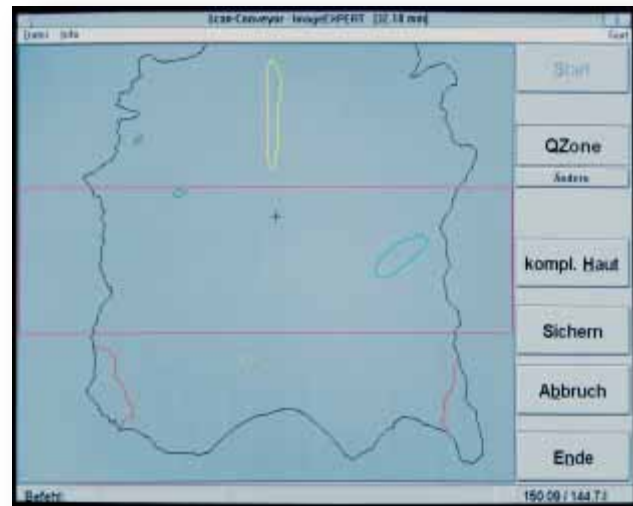

Minimizing waste starts with the exact recording of the leather hides. You will be able to have an instant overview of the total skin. The scan conveyorEXPERT identifies automatically the size of the hide as well as the blemishes / faults. It enables you to digitize the quality zones exactly as far as shape and size are concerned.

Your quality controls must start with the data capture

The exact and documented qualifying allows you flexible, and in stages defined parameter for suitable and unsuitable areas of the hide. This requires the following steps and leads to a reduction of claims.

Work in an ergonomically correct and operator-friendly environment.

The hide will be transported automatically in stages as laid down by the user. A simple digitizing method for the results of the qualifying is

conveyed via a loudspeaker in the respective language of the country that the system is operating in. This guarantees a quick result. The displays are easy to understand and structured in a simplistic manner.

Make your leather data available across your global enterprise

Use scan conveyorEXPERT where you need it, and transfer your data for use at the next site in your process. Expert links your production sites and customer locations, wherever they may be located around the world.

Protect the environment

The scan conveyorEXPERT functions without the need for plastic film. This is environmentally friendly and saves time as well as costs.
